**Backend Developer | C# & .NET | ASP.NET Core | SQL | Computer Science &
Software Engineering Student**

PROFESSIONAL SUMMARY

Motivated and detail-oriented Computer Science and Software Engineering student with hands-on experience in backend development, object-oriented programming, and full-stack web application delivery. Currently completing a B.Sc. in Computer Science at Miva Open University and a Diploma in Software Engineering at Zibeh Institute of Technology (ZIT), Jos. Experienced in building and deploying production-grade REST APIs using ASP.NET Core, PostgreSQL, and React/TypeScript. Passionate about clean architecture, scalable enterprise systems, and purposeful software that solves real problems.

CORE COMPETENCIES

- Backend API Development — designing and building RESTful APIs using ASP.NET Core with clean architecture principles
- Database Design & Management — relational schema design, query optimization, and ORM usage with Entity Framework and SQL Server/PostgreSQL
- Full-Stack Web Development — end-to-end delivery from backend API to React/TypeScript frontend with deployment pipelines
- Desktop Application Development — Windows Forms (WinForms) application development using C# and .NET
- Version Control & Collaboration — Git workflow management, GitHub repositories, branching strategies, and CI/CD
- Monitoring & Evaluation — implementation tracking, data collection, and progress reporting for development programmes

- Problem-Solving & Debugging — systematic identification and resolution of software issues across the stack
- Teaching & Mentoring — breaking down complex technical concepts for beginner and intermediate learners

EXPERIENCE

Monitoring & Evaluation Officer (M&E) *November 2025 – February 2026*

GIZ (Deutsche Gesellschaft für Internationale Zusammenarbeit) – Jos, Nigeria

Programme: ICSS – Inspire, Create, Start & Scale

- Supported the implementation and tracking of the ICSS programme, a GIZ-funded initiative designed to inspire entrepreneurship and scale small business development.
- Collected, organised, and analysed programme data to monitor progress against key performance indicators and deliverables.
- Prepared monitoring reports and documentation to support programme reviews and stakeholder reporting.
- Coordinated with programme teams to ensure timely data capture and accurate record-keeping across implementation activities.

ICT Support Intern

Jan 2023 – Sept 2023

Plateau State Ministry of Justice, Jos

- Assisted with maintaining internal systems used for case management and staff records.
- Supported back-end database tasks such as updates, backups, and user access control.
- Participated in software troubleshooting and patch deployments.
- Worked with the ICT team to digitize documentation processes, improving system accessibility.

Technical Assistant – ICT Department

Aug 2022 – Dec 2022

High Court, Jos

- Helped in configuring user systems and setting up secure file-sharing protocols.
- Monitored and reported server and network issues using diagnostic tools.
- Provided tech support for in-house applications used by court staff and legal practitioners.
- Contributed to the ICT unit's system audit and upgrade planning.

EDUCATION

Miva Open University – Abuja, Nigeria

B.Sc. Computer Science

Status: Undergraduate (In Progress)

Coursework: Data Structures, OOP, Web Technologies, Databases, Software Engineering Principles

Zibeh Institute of Technology (ZIT) – Jos, Nigeria

Diploma in Software Engineering

Expected Graduation: September 2026 | Started: 2024

Coursework: OOP (C#), Data Structures, Algorithms, Database Management Systems, Web APIs, System Analysis & Design

St. James Secondary School – Ugbokolo, Benue State

Senior School Certificate Examination (SSCE)

Graduated: 2020

TECHNICAL SKILLS

Languages: C#, SQL, HTML, CSS, JavaScript, TypeScript

Frameworks & Tools: ASP.NET Core, Entity Framework, WinForms, React, .NET, Visual Studio, Git/GitHub, REST APIs, Tailwind CSS

Database Systems: Microsoft SQL Server, PostgreSQL, MySQL

Deployment & Infrastructure: Heroku, Vercel, Cloudflare DNS, Backblaze B2, GitHub Actions (CI/CD)

Concepts: OOP, Clean Architecture, REST API Design, MVC Pattern, CRUD Operations, Debugging, Version Control

Soft Skills: Problem-Solving, Team Collaboration, Attention to Detail, Time Management, Teaching & Mentoring

PROJECTS

Global Flame Ministry Web Platform

Live: globalflameministry.org

Fullstack Web App | ASP.NET Core, PostgreSQL, Entity Framework, React, TypeScript, Tailwind CSS, Heroku, Vercel

- Designed and built the complete backend REST API handling sermon management, blog publishing, event announcements, donation flows, and an admin dashboard.
- Developed the React/TypeScript frontend deployed on Vercel with Cloudflare DNS and a custom domain.
- Implemented Redis caching, audio storage on Backblaze B2 with Cloudflare CDN, and CI/CD from GitHub.
- Currently active development and production use by the ministry.

PIPDC – Plateau Investment and Property Development Company *In Progress*

FullStack Web App | ASP.NET Core, React, TypeScript, SQL Server, Entity Framework, Tailwind CSS

GitHub: github.com/agbojisimon/PIPDC

- Building a fullstack real estate platform to showcase property listings, handle client enquiries, and provide an admin interface for managing real estate inventory.
- Applying clean REST API design and structured frontend architecture consistent with GFM platform patterns.

God Knows Why Bookshop Management System

Completed

Desktop Application | C#, WinForms, .NET, SQL Server

- Built a Windows desktop application managing bookshop operations including inventory tracking, sales recording, and stock management.
- Designed a relational database schema for books, sales, and user management with Admin and Cashier role-based access.

Login Authentication System

Completed

Desktop Application | C#, .NET Framework, WinForms

- Developed a basic authentication form with placeholder logic and form validation using Windows Forms.

Expense Tracker Application

Completed

Desktop Application | C#, WinForms, MySQL

- Windows Forms application to track daily and monthly expenses with filtering by date, category summaries, and amount totals.

ADDITIONAL INFORMATION

- Open to remote and in-office opportunities across Nigeria and internationally.
- Currently deepening knowledge in software architecture patterns, clean code principles, and distributed systems design.
- Actively building and deploying production applications with real-world clients.
- Passionate about faith, reading technical literature, and teaching others software development concepts.
